

Agency Report to Area QI Committee

Agency:

Time Period Reported:

Person Reporting:

Indicators Reviewed: standards met								NA = not applicable	
	Documentation regional standard 75%			BLS Protocols national standard 70%			ALS Protocols national standard 80%		
	# of PCRs reviewed ¹	# in compliance	%	# of PCRs reviewed	# in compliance	%	# of PCRs reviewed	# in compliance	%
cardiac arrest									
multiple trauma									
pediatric (age 6 and under)									
GCS<15 Acute onset New onset									
Stroke									
other (list)									

¹To get the percentage, take the "number in compliance," divide it by the number of PCRs reviewed, then multiply by 100.

List reasons for ALS Fallout:

Please list Reasons for ALS Fallout by category; please explain any "other":

Cardiac:

No.

- No ALS treatment
- Appropriate meds not given
- No IV
- No EKG/monitor
- No 2° tube confirmation
- Protocol deviation
- Insufficient vitals
- Other:
- Other:

Pediatric:

No.

- No ALS
- No glucose check
- No IV
- Appropriate meds not given
- Protocol deviation
- Insufficient vitals
- Other:
- Other:

Trauma:

No.

- Refusal not according to protocol
- No ALS treatment
- Long scene time
- No immobilization
- Protocol deviation
- Insufficient vitals
- Other:
- Other:

GCS <15:

No.

- Refusal not according to protocol
- No ALS
- Appropriate meds not given
- No glucose check
- Protocol deviation
- Insufficient vitals
- Other:
